FEBRUARY 1989

Following are a series of reports related to public library service for the period of July 1, 1987, to June 30, 1988. This information is generated from the WYOMING PUBLIC ANNUAL ACTIVITY REPORT. The data, inferences, and extractions are presented under the assumption that the reporting counties kept generally reliable statistics of library activities and adequate records of library expenditures.

These reports attempt to provide a perspective which can assist Boards and directors review the year's output, reflect on the county's ranking within the state, and plan future goals. The first document is the summary of public libraries as reported in the annual reports, followed by rankings of the 23 counties in selected categories. Comparative analysis of counties should be made carefully noting that reporting differences, priorities in services, the influencing factors of branch libraries, or other parameters will influence comparing output measures.

The five year statewide summary of libraries attempts to identify some categories for which reported data was fairly accurate and consistant across libraries for those years.

Output measures from branch libraries continue to be incomplete. The document on branch libraries is the first attempt to look at branch service and resources, reviewing the hours of service. As more branch libraries provide accurate data, future reports can be generated with summaries to provide reviews of collection sizes, staffing, and usage.

The final two reports are summaries of LSCA grants related to the public libraries in the state. The six year review identifies applications submitted and grants awarded for projects during those years. The second of these two reports provides a percentage breakdown of LSCA funds which have gone to the libraries.

Special acknowledgement goes to Kim Goodmay and Linda Fayant for data entry and word processing involved in this project.

PUBLIC LIBRARY STATISTICS
FISCAL YEAR 1989

April, 1990

Suzanne LeBarron
State Librarian

Wyoming State Library
Supreme Court and Library Building
Cheyenne, Wyoming

Prepared by: Jerry Krois
Deputy State Librarian

Maria Mancuso
Assistant

Following are a series of reports related to public library service for the period of July 1, 1988 to June 30, 1989. This information is generated from the WYOMING PUBLIC LIBRARIES ANNUAL ACTIVITY REPORT. The data, inferences, and extractions are presented under the assumption that the reporting counties kept generally reliable statistics of library activities and adequate records of library expenditures.

These reports attempt to provide a perspective which can assist Boards and Directors review the year's output, reflect on the county's ranking within the State, and plan future goals. The first document is the summary of public libraries as reported in the annual reports, followed by rankings of the 23 counties in selected categories. Comparative analysis of counties should be made carefully noting that reporting differences, priorities in services, the influencing factors of branch libraries, or other parameters will influence comparing output measures.
